Constructed by Mr. Michael Collver, Trent Yates and David Yaun of Blacksburg High School with the help of Nick Blevins of Christiansburg High School Harriet is lively life-sized found object sculpture of a holstein cow. Thanks to the materials donated by Mary Nickel of McCoy, VA and body, head and concept from Diane Relf and Dave Angle of Christiansburg, we were able to make use of the Blacksburg High School STEAM Lab for assembly and painting. Look closely and you should find local artifacts from Appalachian life dating back to the 1930's! Can you guess from which former Blacksburg landmark came the steel wastepaper basket for her head? Hint: we painted over the words, "Main Office".
